Profile Summary

Software & Cloud Engineer with experience building and deploying scalable applications using Node.js, TypeScript, PostgreSQL, and AWS. Experienced in Docker, CI/CD, REST API development, and cloud-native architectures, with a focus on building secure and production-ready systems.

Experience

Senior ICT Assistant – University of Energy and Natural Resources (UENR)

IT Directorate | April 2026 – Present

- Perform staff data analysis, reporting, and data-driven analysis to support institutional decision-making, including monthly and quarterly reports.
- Extract, clean, analyze, and present staff data for management and institutional reporting requirements.
- Respond to data requests from departments and stakeholders, ensuring accurate and timely retrieval of information.
- Provide technical and IT support for institutional systems, applications, and day-to-day technology operations.

Software Developer (Freelance & Contract)

Remote | January 2024 – Present

- Designed and developed scalable backend APIs and integrations for web and mobile applications.
- Built full-stack applications using Python (Django) and Node.js, delivering secure and high-performance systems.
- Designed and optimized PostgreSQL databases, improving query performance and system efficiency.
- Integrated third-party APIs and AI-powered services into production systems.

Teaching & Research Assistant

University of Energy and Natural Resources (UENR) | Oct 2024 – Sept 2025

- Assisted in teaching core Computer Science concepts, including software engineering and databases.
- Supported research, technical writing, and development of structured learning materials.

Cloud Engineering Intern (AWS re/Start Program)

AmaliTech (Remote) | Sept 2024 – Jan 2025

- Built and deployed cloud-native applications using AWS services including EC2, S3, Lambda, API Gateway, and RDS.
- Implemented CI/CD pipelines using Docker, Jenkins, and GitHub Actions.
- Designed serverless architectures for scalable and cost-efficient systems.
- Automated workflows using AWS Lambda and Step Functions.

Projects

Face Recognition Attendance System (AI-Powered)

Flutter | AWS Rekognition | Lambda | API Gateway

- Built an AI-powered attendance system using facial recognition.
- Designed backend APIs for identity verification and attendance tracking.
- Implemented a secure serverless architecture supporting 500+ users.

Full-Stack Web Application

Node.js | PostgreSQL | Docker

- Designed and implemented RESTful APIs with Node.js
- Built and optimized PostgreSQL database schemas and queries
- Containerized application using Docker for consistent deployments

CI/CD & Kubernetes Deployment System

Docker | Kubernetes | GitHub Actions | ArgoCD

- Designed automated CI/CD pipelines for application deployment
- Deployed containerized applications to Kubernetes clusters
- Integrated ArgoCD for continuous delivery and version control
- Reduced deployment time by 60% and improved reliability

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL

Backend: Node.js, Django, REST APIs, Microservices, JWT, Webhooks

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, SQL, Database Design, Query Optimization

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD, ArgoCD, Linux, NGINX

Education

Bachelor of Science in Computer Science

University of Energy and Natural Resources, Sunyani, Ghana

Certifications

- [AWS Certified Solutions Architect – Associate \(SAA-C03\)](#) – Amazon Web Services, 2026
- [AWS Certified Cloud Practitioner \(CLF-C02\)](#) – Amazon Web Services, 2025
